

## Emulsifier OS (MS-1)

**[Chemical Composition]** alkylphenol ether sulfosuccinate sodium salt

**[Type]** anion

**[Technical data]**

Appearance:	colorless to yellow transparent liquid or jelly
P H value:	4.0~7.0 (1% aqueous solution)
Solid content:	40±2%

### **[Performance and Application]**

1. Soluble in hot water and general solvent, and good emulsifying, dispersing, wettability, suspension, decontamination and foaming properties.
2. in the paint industry, used as an emulsifier for the production of light emulsion paint.
3. Improving the stability and dispersibility of the dye paste in the dyeing process.
4. In the pesticide, used as a special effect agent for emulsifier and pesticide suspension.
5. Used as an emulsifier in the production of polyethylene emulsions.

### **【Packing, Storage and Transportation】**

Packed in 200Kg iron drum and 50Kg plastic drum.

Store and transport as normal chemicals. Store in a dry, well-ventilated place. The warranty period is one year.
